

# Property: **exemplifiedBy**

## Headline

"Featured" 101wiki pages

## Description

There are several usecases for this property; they all are meant to help with the collaborative character of 101wiki editing and associated evolution or quality challenges.

### **Featured members of namespaces**

101wiki pages readily associate themselves with 101wiki namespaces (just by using the namespace in the URL). We use the present property as a means to highlight "featured" members of a namespace. That is, an "exemplifying" page is (should) be more likely to be properly representative of how pages within the namespace are supposed to look like.

### **Featured usage of sections**

101wiki pages readily exercise 101wiki sections ([Namespace:Section](#)). We use the present property as a means to highlight "featured" pages that exercise the section in question in a reasonable manner. That is, an "exemplifying" page is (should) be more likely to be properly representative of how pages are supposed to instantiate the section at hand.

### **Featured usage of properties**

The metadata sections of 101wiki pages readily exercise semantic properties. We use the present property as a means to highlight "featured" pages that exercise the property in question in a reasonable manner. That is, any occurrence of the property on the "exemplifying" page is (should) be more likely to be properly representative of how pages are supposed to use the property at hand.

# Namespace: **Section**

## Headline

The namespace of sections used on 101wiki

## Description

This namespace is dedicated to the sections that are used on 101wiki. That is, each member of the namespace describes a section that may be used on 101wiki pages. In this manner, members of the namespace provide a semi-structured metamodel of 101wiki.
